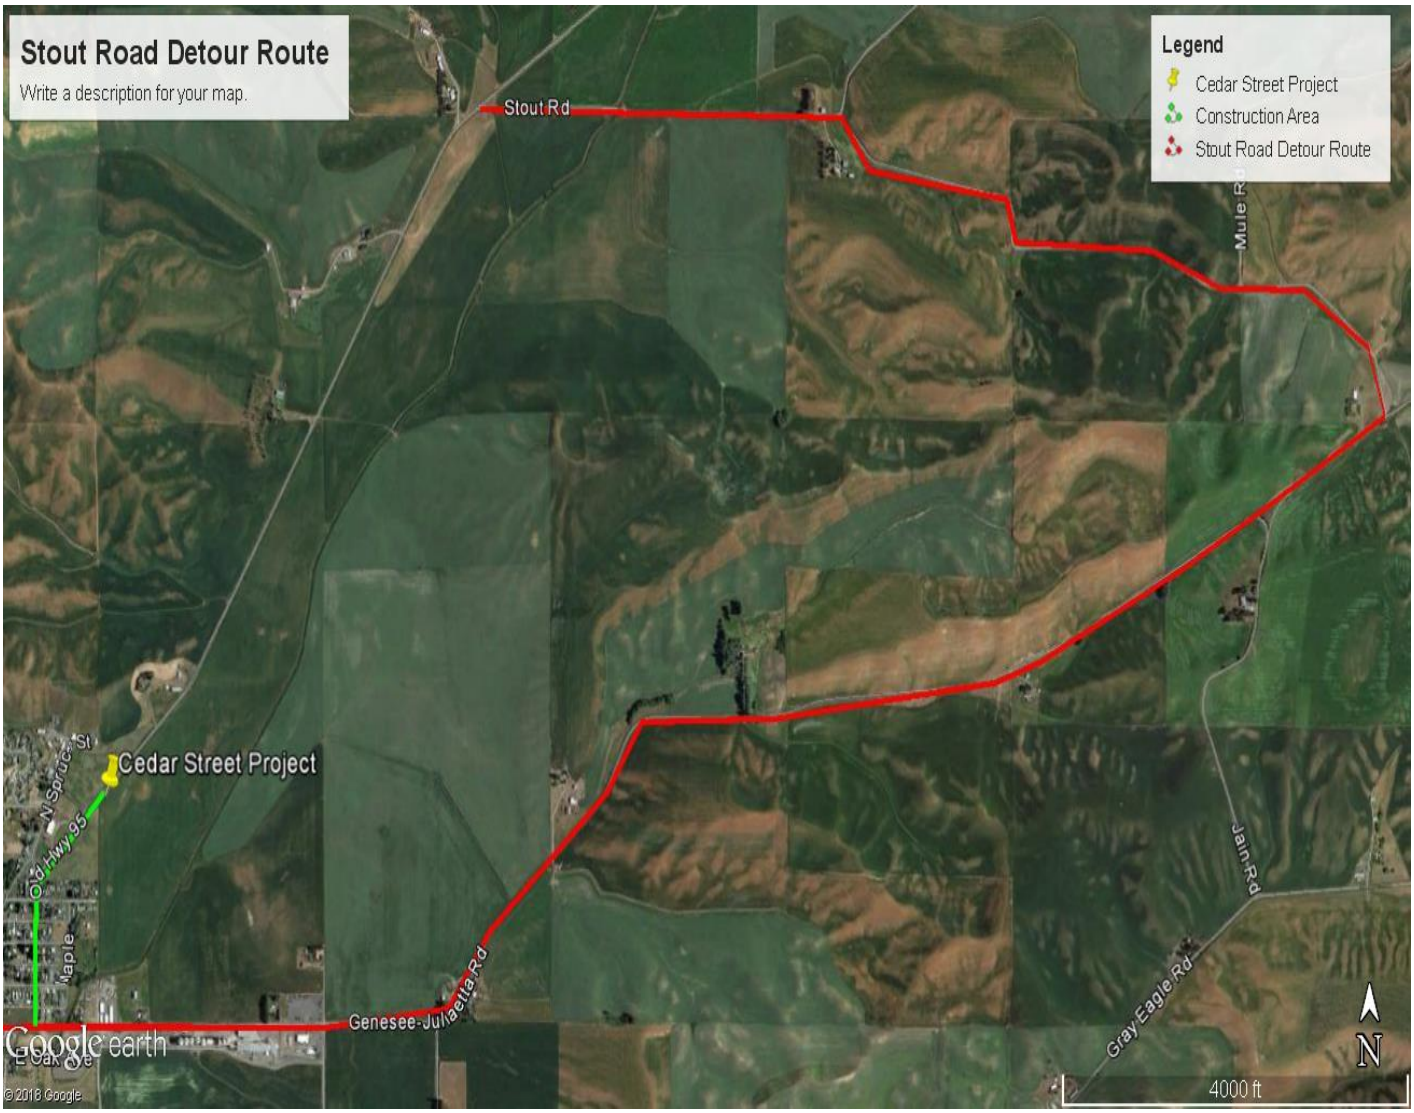
Cedar Street/Old Hwy. 95 Re-Surfacing Project


The City of Genesee will be re-surfacing and widening Cedar Street/Old Hwy. 95 beginning **Monday JUNE 17th thru JUNE 28th.** This project will **require closing Cedar Street** from thru traffic for 10 to 14 days from Chestnut Street north to the city limits. Due to the re-surfacing process, traffic needs to be limited to identified crossings on Cedar Street until the new surface fully cures. These identified crossings will be for local resident traffic only. There will be absolutely no heavy truck traffic allowed on Cedar Street during this closure. **Two alternative routes (Stout Road and Sather Road) have been identified for rural residents and large truck and farm equipment to access the city.** The Stout Road route is identified in the map below. The city of Genesee appreciates your patience and understanding while we make this much needed improvement. If you have any questions, please call Genesee City Hall at 208-285-1621.
